Web Developer skilled in building responsive, scalable, and SEO-optimized applications using JavaScript, PHP, MySQL, and modern frontend frameworks. Passionate about delivering impactful digital solutions.

## Experience

### Web Developer — BullAura Service Private Limited

(May 2025 - Jun 2025)

- Collaborated with teams to deploy new functionality and ensure smooth integration with business workflows.
- Improved CRM usability and features to enhance overall user experience and system performance.

### WordPress Developer — WiitzEnd

(Aug 2023 - Mar 2025)

- Revamped UI and responsiveness, improving website engagement by 30%.
- Implemented SEO best practices resulting in a 20% increase in page ranking.
- Built a recruitment portal enabling 50+ candidates to apply seamlessly.

### Event Volunteer — Swabhagita, Straniya Welfare Association

- Supported event coordination, participant assistance, and on-ground logistics.
- Contributed to promoting social welfare initiatives and enhancing community engagement.

### Event Volunteer — Real Skill Hackathon, organized by IC IIT Patna and Real Skill

- Supported in smooth registrations and logistics to ensure smooth event operations
- Collaborated with the organizing team to manage event schedules and technical arrangements.

## Projects

### RareBlocks - Blogging Platform

- Built a dynamic blogging platform using React and JavaScript with seamless article fetching through API integration.
- Implemented pagination to improve content navigation and performance for users browsing multiple posts.
- Added 404 error handling and route validation to ensure a smooth and reliable user experience even on invalid pages.

### Student Management Portal

- Created a PHP-MySQL full-stack system for efficient student data and process management.
- Implemented separate login systems for Admin and Students with secure, role-based access.
- Enhanced student record handling and improved overall user experience for institutions.

### Weather Application

- Built a sleek and fully responsive weather web app using HTML, CSS, JavaScript, and the OpenWeatherMap API.
- Displays real-time weather data including temperature, sunrise/sunset, pressure, wind speed, and more.

### FocusNote

- Created a full-stack To-Do system using React and Supabase to support real-time database communication.
- Implemented user authentication and secure CRUD operations ensuring each user manages their own tasks.
- Designed a clean and responsive UI enabling smooth task creation, editing, filtering, and completion tracking.
